Foreword

 HIS new catalogue is an endeavor to place before you a comprehensive list of plant material available at our nurseries, so arranged as to assist you in quickly finding the information desired.

The three main divisions of plants, Deciduous, Evergreen and Herbaceous, are arranged separately in alphabetical order, and the whole completely indexed by using both the common and botanical name.

It is hoped the brief descriptions and appended "Lists" will prove helpful when compiling your planting plans.

We exercise every care in digging, shipping and delivery of our products, but we cannot guarantee stock to grow under all conditions, and make no replacements unless such loss is directly due to negligence or carelessness on the part of our employees.

Located in Flushing, the oldest nursery center in America, we are readily accessible from all points by train, trolley, subway, or motor bus. Visitors are always welcome.

While we do no outside planting, we are in close touch with competent landscape designers and will gladly assist you in making appointments.

Shipping Directions

Customers are requested to give careful and explicit shipping directions. When no such instructions are given, we will use our best judgment. Upon delivery to common carrier, goods travel at purchaser's risk and expense and claims for loss or undue delay must be made to the carrier. All claims for shortages or error should be made immediately upon receipt of the goods.

Conditions of Sale

Prices per ten and hundred apply only when the quantities specified are taken, except that five and fifty will be sold at the ten and hundred rate respectively.

Prices in this catalogue cancel all previous lists and are subject to change without notice. Cost of packing will be extra. Prices include local delivery, but a special charge covering cost is made on distant or special deliveries.

Deciduous Trees, Shrubs and Vines

NOTE—The figures in *italics*, following each variety, indicate in feet the approximate height of that plant at maturity in the northern half of the U. S.

Varieties marked with an asterisk are best dug with a ball of earth and burlapped to minimize loss. This involves, except where marked B. & B., an extra charge per plant as follows:
